MicroClear® 102

For Salt Water Environments

Product Bulletin

Environmental Leverage has Lab Analysis Service Available

MicroClear® 102 is a high potency, bacteria-laden, powdered formulation for use in controlling algae through the competition of available nutrients in the water. **MicroClear® 102** contains a specially formulated, proprietary blend of microorganisms and surface tension suppressants/penetrants. Because of the diversity of the microorganisms enzyme systems, this product is excellent for increasing water clarity through controlling algae population. The safe naturally occurring bacteria and enzyme systems are present in high numbers to handle difficult algae and odor related problems in a saltwater environment with high salinity 1-3%. *Before and after photos*
